**Source**

Plasma

---

**Species**

Human

---

**Product Overview**

Human Gamma Globulin powder is derived from human plasma using Cohn Fractionation methods. Plasma used to manufacture the product was collected in FDA-licensed facilities and tested negative for HBsAg, anti-HIV 1/2, anti-HCV, HIV-1 RNA and HCV RNA on FDA approved methods. Each donor was tested and found negative for syphilis per FDA guidelines. Human Gamma Globulin is used in IVD manufacturing and life science applications.
