

## Recombinant Influenza B nucleo Protein

### Product Information

---

**Product Name**

Recombinant Influenza B nucleo Protein

---

**Short Name**

Recombinant Influenza B nucleo Protein

---

**Cat#**

Nucleoprotein-12I

---

**subgroup**

E. coli Expressed

---

**Recombinant**

E. coli

---

**Abbr**

Nucleoprotein(Influenza B)

---

**Alias**

Nucleoprotein; N

---

**Type**

N

---

**similar**

Nucleoprotein

---

**Product Overview**

This recombinant protein contains full length of Influenza A nucleoprotein with a MW of 69.6 kDa. It is recognized by positive samples in ELISA tests.

---

**Description**

Influenza B viruses (IBVs) circulate annually along with influenza A (IAV) strains during seasonal

## Recombinant Influenza B nucleo Protein

epidemics. Influenza B viruses can dominate influenza seasons and cause severe disease, particularly in children and adolescents. Influenza B virus is only known to infect humans and seals with influenza.

---

**Source**

E. coli

---

**Species**

Influenza B

---

**Form**

Affinity purified, liquid

---

**Molecular Mass**

69.6 kDa

---

**Purity**

>90% pure by SDS-PAGE

---

**Applications**

Suitable for use in ELISA, Lateral Flow, WB, and other immune tests.

---

**Storage**

Upon receipt, quick spin before open vial, aliquot and store at  $\leq -20$  centigrade. Avoid multiple freeze/thaw cycles

---

**Storage Buffer**

Tris-buffered saline, pH 8.0

---

**Preservative**

0.1% ProClin 300

---

**Official Symbol**

Nucleoprotein

---

**Synonyms**

---
