Chicken Blood In Heparin Sodium

Product Information

Catalog

BD-010C

ProductName

Chicken Blood In Heparin Sodium

Short Name

Blood(Chicken)

similar

Blood

Source

Blood

Species

Chicken

Product Overview

Chicken Blood In Heparin Sodium

Description

Chicken whole blood is aseptically collected and prepared to order from our colony of animals. These cell suspensions are useful for the titration of complement, adsorption procedures, testing for agglutinins/HA assays, and for the preparation of stroma as particulate reagents. Chicken red blood cells are perishable and are collected and processed upon receipt of your order.

Form

None

Applications

Chicken Blood In Heparin Sodium

Applications Notes: Washed pooled cells preparations, complement titration, adsorption procedures, HA assays and for the preparation of stroma as particulate reagents.

Storage

Store chicken whole blood at 4 centigrade prior to opening. Use aseptic technique to maintain sterility when opening product. Be advised that blood is a perishable product and exact shelf life may depend on application.

Shipping
